SUMMARY

AWS-certified Cloud & AI Engineer with 3.5+ years building production-grade cloud systems, AI/ML pipelines, and event-driven architectures. Designed Bedrock (Claude) document processing pipelines achieving 95%+ extraction accuracy with 60% hallucination reduction. Engineered serverless backends handling 100K+ daily events at 99.7% uptime across logistics and operations domains. Proficient in Python, Node.js, SQL, and 20+ AWS services. Holds AWS Solutions Architect Professional and Data Analytics Specialty certifications.

PROFESSIONAL EXPERIENCE

Software Engineer
Sep 2022 – Present

BizCloud Experts · Hyderabad, India

Cloud consulting firm delivering AWS-native solutions for enterprise clients across logistics, operations, and AI domains.

GTS AI Operations Platform
Dec 2025 – Present

Cloud & AI Infrastructure Engineer

Python, AWS SAM, Lambda, Aurora PostgreSQL, Bedrock (Claude), Textract, SQS, Cognito, CloudWatch

- Built end-to-end LLM document processing pipeline using Textract (OCR) and Bedrock (Claude); achieved **95%+ extraction accuracy**, eliminating 20 hrs/week of manual data entry
- Implemented two-stage Bedrock validation — accuracy check + hallucination detection — reducing hallucination rate by **60%**
- Reduced LLM token costs **40%** ($18K → $11K/year) through prompt caching, output constraints, and model routing by document complexity
- Delivered 40+ RESTful API endpoints with SAM/Lambda; maintained **99.5%+ availability** with sub-1-hour incident response via CloudWatch dashboards
- Conducted 25+ code reviews; mentored junior engineers on AWS best practices and clean architecture patterns

ICAT Logistics — Cloud & Data Platform
Jun 2025 – Dec 2025

Technical Lead

Python, Lambda, DynamoDB, EventBridge, SNS, SQS, DMS, S3, Terraform, CloudWatch

- Led cloud cost-optimization and data modernization initiative for high-volume DMS pipelines and event-driven ETL systems
- Architected improvements to DMS task configurations and S3 data-layer structure, **reducing data movement costs and cloud spend**
- Executed 30-hour production migration window, coordinating infrastructure changes across 15+ microservices with **zero data loss**
- Stabilized production event-driven workflows by resolving critical issues across Lambda, SQS, EventBridge, and DMS
- Served as technical point of contact for stakeholders, communicating risks and mitigation strategies

Omni Logistics — Backend & Data Engineering
Jan 2023 – Sep 2025

Full Stack Engineer

Node.js, Python, Lambda, DynamoDB, Redshift, EventBridge, Step Functions, Glue, DMS, S3, Terraform

- Designed and developed scalable backend services using Node.js and Python, improving system reliability and reducing production downtime by **15%**
- Built RESTful APIs integrating internal platforms with external systems, improving operational efficiency by **40%**

KEY ACHIEVEMENTS

AI Automation
Eliminated 20 hrs/week manual work; cut LLM costs 40%

Pipeline Reliability
Zero-data-loss migration across 15+ microservices

Scale & Uptime
100K+ daily events at 99.7% uptime with monitoring

Cost Optimization
Reduced infra costs 20% and manual workload 50%

SKILLS

Python, Node.js, JavaScript, SQL, AWS Lambda, Bedrock, Textract, Aurora PostgreSQL, DynamoDB, Redshift, SQS, SNS, EventBridge, Step Functions, S3, API Gateway, Cognito, CloudWatch, VPC, Terraform, AWS SAM, AWS CLI, DMS, Glue, ETL, REST APIs, OpenAPI, Microservices, Serverless, CI/CD, Bash, Git

CERTIFICATIONS

AWS Solutions Architect – Professional
Jan 2026 – Jan 2029

AWS Data Analytics – Specialty
Sep 2024 – Sep 2027

AWS Solutions Architect – Associate
Jan 2023 – Jan 2029

AWS Generative AI Essentials
2024

PROJECTS

AI-Powered Dev Workflow
2024

Kiro IDE · MCP · Playwright · Bash · Aurora PostgreSQL

- Configured MCP servers for autonomous browser testing, Bastion SSH tunneling, and live DB queries against Aurora PostgreSQL in private VPC
- Built custom hooks: DB write guard blocking destructive queries, OpenAPI sync on API file edits, schema migration auto-updates

Grammar Correction Agent
2025

Python · Grok API · Ollama · Qwen 2.5 / Mistral

- Built local grammar agent as zero-subscription Grammarly alternative using Grok API; migrated to offline Ollama models
- Optimized prompts with strict output constraints — concise corrections, no filler, self-review before output

- Implemented serverless architectures using Lambda, API Gateway, and S3, reducing cloud infrastructure costs by **20%**
- Redesigned eventing pub-sub model, reducing delivery turnaround time by **20%** and improving customer satisfaction
- Reduced manual workload by **50%** through automated exception alert flows using EventBridge, Step Functions, and SQS
- Led design and implementation of ETL pipelines using AWS DMS, Glue, Redshift, and DynamoDB; built S3-triggered Lambda workflows for near-real-time data ingestion
- Deployed fully serverless infrastructure using Terraform for cost-effective scalability

RNDC — EDI Integration Feb 2025 – Apr 2025

Software Engineer

Python, Lambda, S3, SQS, B2B Services

- Developed B2B EDI-to-JSON transformation system using Python and AWS Lambda for 10K+ daily transactions
- Implemented robust data transformation logic, optimizing runtime and reducing latency from 3s to **under 1s**
- Built cost-effective Lambda pipelines with comprehensive error handling and monitoring

EDUCATION

B.Tech, Mechanical Engineering Jun 2016 – Apr 2020

Kakatiya Institute of Technology and Science

Warangal, India
