Mohammed Sazeed

AI INFRASTRUCTURE & MLOPS ENGINEER

CLOUD · DEVOPS · AI / ML

+91-8686286289 • mohammedsazeed2@gmail.com • linkedin.com/in/mohammed-sazeed-a2b209165 • mohammedsazeed.in • Hyderabad, India

SUMMARY

AWS-certified Software Engineer with 3.5+ years deploying production LLM inference pipelines, AI agent orchestration systems, and cloud-native MLOps infrastructure on AWS. Reduced LLM costs 40%, achieved 95%+ model accuracy, and built multi-agent MCP orchestration with production guardrails across enterprise logistics and AI operations clients. Proficient in Python, Terraform, CI/CD automation, and 20+ AWS services. AWS Solutions Architect – Professional certified.

EXPERIENCE

Software Engineer
Sep 2022 – Present

BizCloud Experts · Hyderabad

Cloud consulting firm delivering AWS-native solutions for enterprise clients across logistics, operations, and AI domains

CLIENT ENGAGEMENTS

GTS AI Operations Platform Cloud & AI Infrastructure — Dec 2025 – Present

Python · AWS SAM · Lambda · Aurora PostgreSQL · Bedrock (Claude) · Textract · SQS · Terraform · CloudWatch · Kiro IDE · MCP

- Architected production **LLM inference pipeline** integrating Bedrock (Claude) + Textract for document intelligence; achieved **95%+ extraction accuracy**, eliminating 20 hrs/week manual data entry
- Implemented two-stage LLM validation — accuracy gate + hallucination detection via re-prompting — reducing hallucination rate by **60%** with zero model switch required
- Reduced **LLM inference costs 40%** ($18K → $11K/yr) through prompt caching, output constraints, and complexity-based model routing (Haiku → Sonnet)
- Designed **AI agent orchestration infrastructure** with Kiro IDE + MCP servers (Playwright, Bastion SSH); built `preToolUse` DB write guard and `fileEdited` OpenAPI sync hooks — enabling **multi-agent collaboration** with zero destructive incidents
- Maintained **99.5%+ availability** across 40+ endpoints with sub-1-hour MTTR via CloudWatch observability stack; delivered 40+ REST APIs via Terraform IaC and GitHub Actions CI/CD

ICAT Logistics Cloud & Data Platform — Jun 2025 – Dec 2025

Python · Lambda · DynamoDB · EventBridge · SNS · SQS · DMS · S3 · Terraform

- Resolved 12 pipeline defects by implementing **idempotency keys** in DynamoDB control tables, **SQS FIFO** for exactly-once ordering, and **DLQ + redrive workflows** for failure isolation — reducing error rate from **8% → 0.5%**; cut query latency **45%** via DMS partitioning and Parquet compression
- Led 30-hour **zero-downtime production cutover** coordinating 15+ microservices with zero data loss

Omni Logistics Backend & Data Engineering — Jan 2023 – Sep 2025

Node.js · Python · Lambda · DynamoDB · Redshift · Step Functions · Glue · S3

- Built event-driven backend on Lambda/DynamoDB processing **100K+ daily events** at **99.7% uptime**; integrated 15+ REST/EDI APIs and improved operational efficiency **40%** via Glue, Redshift, and Step Functions ETL pipelines (Node.js · Python · Redshift · Glue · DMS · S3)

RNDC EDI Integration — Feb 2025 – Apr 2025

Python · Lambda · SQS · S3

- Delivered Python/Lambda EDI-to-JSON pipeline for **10K+ daily B2B transactions** at 99.5% success rate; cut latency 3s → under 1s and reduced infra costs **20%** via serverless architecture (Lambda · S3 · SQS)

EDUCATION

B.Tech, Mechanical Engineering — Jun 2016 – Apr 2020

Kakatiya Institute of Technology and Science · Warangal

KEY ACHIEVEMENTS

LLM Cost Governance
40% inference cost cut ($18K → $11K/yr) via model routing & prompt optimization

Agent Orchestration
MCP multi-agent infra with production guardrails — zero destructive incidents

Reliability
99.5–99.7% uptime across AI systems; sub-1-hour MTTR

Pipeline Scale
100K+ daily events; 30-hr zero-downtime cutover, 15+ microservices

SKILLS

Python · Bash · Node.js · SQL · Docker · Terraform · GitHub Actions · AWS SAM · AWS Lambda · Bedrock · Textract · Aurora PostgreSQL · DynamoDB · Redshift · SQS · SNS · EventBridge · S3 · CloudWatch · VPC · Cognito · LLM inference · MLOps · Prompt engineering · MCP orchestration · Ollama · Glue · DMS · ETL · Step Functions · REST · OpenAPI · Microservices · Git

CERTIFICATIONS

AWS Solutions Architect – Professional
Jan 2026 – Jan 2029

AWS Data Analytics – Specialty
Sep 2024 – Sep 2027

AWS Solutions Architect – Associate
Jan 2023 – Jan 2029

AWS Generative AI Essentials
2024

PROJECTS

AI-Powered Dev Workflow — 2024

Kiro IDE · MCP · Playwright · Bash · Aurora PostgreSQL · OpenAPI

- Multi-tool AI agent coordination via MCP servers — Playwright, Bastion SSH, OpenAPI sync
- `preToolUse` hook blocks destructive DB ops without approval; SELECT auto-approved
- `fileEdited` hook triggers OpenAPI sync on handler changes; steering injects DB context per session

Grammar Correction Agent — 2025

Python · Ollama · Qwen 2.5 / Mistral · Grok API

- Offline LLM inference agent using Ollama; migrated from Grok API for zero-cost local serving
- Model-agnostic design — same pipeline, swappable backends with prompt optimization
